## STYLE REPORT

Fall 2013

While the garage isn't often associated with high style, this season's apparel and accessories borrow freely from exceptional automobile design. Taking cues from classic interiors, carryalls are crafted from supple two-toned black and tan leather and feature quilt-stitching. Sunglasses with marbled temples mimic the wooden dashboard and trim found in vintage cars, giving an old-school look to eyewear. Folios and briefcases made from carbon fiber recall the high-gloss exteriors of some of the world's most luxurious cars, and the unexpected material provides a more durable alternative to traditional canvas or nylon. And if you want to replicate street-racer style from head to toe, don't forget to lay the foundation with a modern moto jacket and a tough black jean. The end result is a sleek, handsome look worthy of the fast lane.

Ground a high-speed outfit with well-worn denim and an equally edgy jacket
